

Pillar

by Equate

The Pillar frame takes its inspiration from the strength and simplicity of architectural concrete pillars, strong, tall and inherently sturdy.

Its distinctive pill-shaped legs create a bold yet refined silhouette, providing a solid foundation engineered for stability and everyday performance.

Like the architectural structures that inspired its name, Pillar is designed to support, endure and stand the test of time.

Designed in Singapore. Inspired by the architecture around us. Built to support.

DESIGNED FOR EVERY WORKPLACE

From standalone desks to back-to-back workstations, Pillar adapts effortlessly to a wide range of floorplate configurations.

Available in 90°, 120° and 180° settings, the system offers the flexibility to create focused individual workpoints, collaborative clusters and large-scale workstation layouts.

A choice of controller options allows Pillar to be tailored to different workplace requirements and styles, while bases are offered in Black or White powdercoat as standard, with a further 14 colours available on request.

PERFORMANCE, BUILT IN

Engineered for smooth, quiet and reliable movement, Pillar combines a true ergonomic height range with premium anti-collision technology for a safer, more intuitive sit-to-stand experience.

Height Adjustment | 570–1290mm
Adjustment Speed | 40mm/s
Operating Noise | <45dB
Safety | Premium anti-collision technology
Warranty | 10-year structural warranty
Lead Time | 8 weeks

RESPONSIBLY MADE

Pillar is BIFMA and Global GreenTag certified and manufactured in a zero-waste-to-landfill facility — combining considered design, proven performance and responsible production.

Designed in Singapore. Inspired by the built environment around us. Built to support.

FEATURES + BENEFITS

Elbow Cable Tidy

A considered cable management solution designed to move seamlessly with the height-adjustable workstation. The articulated Elbow system guides power and data neatly between the frame and worktop, keeping cables organised, protected and discreetly concealed. By eliminating the visual clutter of traditional hanging cable snakes, Elbow creates a cleaner, more considered workspace.

Pill-Shaped Leg Design

The defining feature of the Pillar system. Moving beyond the conventional square or round legs typically seen in workstation systems, Pillar's distinctive pill-shaped profile offers a more design-led and considered alternative. Strong and stable, while maintaining a softer, more distinctive silhouette.

Single Bracket. No Visible Fixings.

Designed for a clean, uninterrupted aesthetic, Pillar uses a single discreet screen bracket, with all other fixings concealed within the framework. With no additional clips, clamps or visible hardware, the screen appears seamlessly integrated into the workstation.

SCREEN OPTIONS

- Central Fixed Screen
- Three-Sided Full Wraparound Screen
- Single Desk-Mounted Screen
- 90° Corner Wrap Screen
- Slide-On Divider Screens

MATERIALS

- PET Environmental Screen
- Upholstered Screen with Fabric Edge detail
- House Fabric in various colours
- Customer Specified Fabric

POWER & CONNECTIVITY

Pillar offers a flexible range of power, data and height-adjustment solutions, allowing each workstation to be configured to suit the needs of the space and its users.

Choose from multiple height-adjustable controller designs, above-desk and below-desk power options, with integrated cable access through flip lids or scallop cut-outs.

Thoughtful cable management is integrated throughout the Pillar framework, with wiring neatly concealed within the Elbow cable system and generous integrated cable trays, keeping power accessible while maintaining a clean, streamlined workspace.

FINISHES & CUSTOMISATION

Base Finishes

Standard in Black and White. Available in 14 house powdercoat colours on request.

Worktops

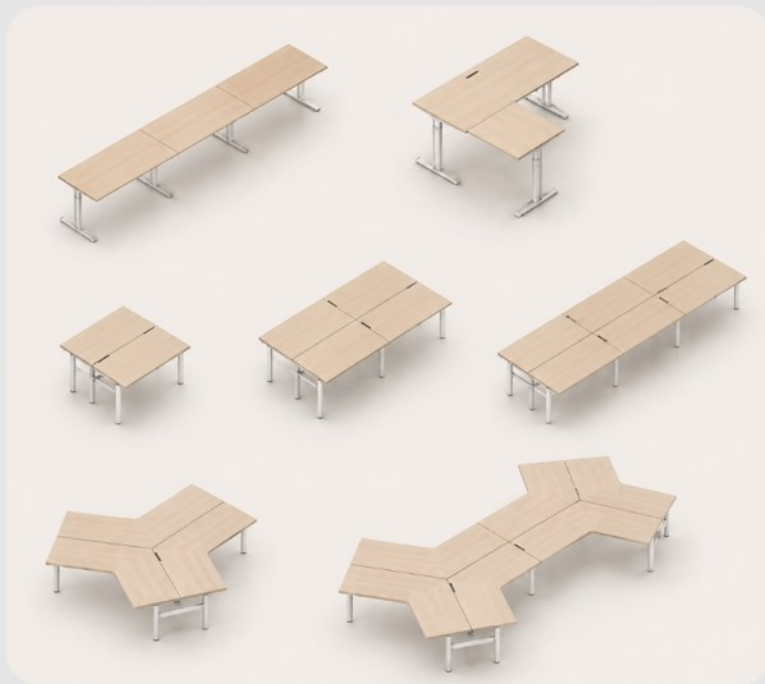

Choose from our curated house MFC finishes, or specify your own preferred finish to suit the project palette. Various edge details and profiles available.

Screens

Available in PET board or house fabric finishes, with a large range of colours + designs. Or the customer's own selection.

CONFIGURED AROUND YOU

From individual workpoints to large-scale collaborative settings, Pillar is designed to adapt to the way you work. Its flexible framework supports a wide range of configurations, making it easy to respond to different floorplates, team sizes and workplace styles.

Bench

Efficient back-to-back workstations for teams of any size, from compact clusters to continuous runs.

90°

Right-angle configurations designed to maximise corners and create defined individual work zones.

120°

A more organic, collaborative layout that creates generous workpoints while encouraging connection between users.

Standalone

A simple, individual workstation offering complete flexibility in placement and specification.

MADE TO FIT

Pillar is completely customisable. Workstation dimensions, configurations, worktop shapes, finishes, screens, power solutions and frame colours can all be tailored to suit the project.

From a single desk to an entire floorplate, Pillar can be made to virtually any size, layout and finish — giving designers the freedom to create a workstation system around the space, rather than designing the space around the system.
